

## SUSTAINABLE PROJECTS AND CERTIFICATIONS

**TRIÂNGULO<sup>®</sup>**

Hardwood Floors

# TECHNOLOGY IN HARDWOOD FLOORS

Developed under an intelligent and innovative concept, Triângulo engineered floors mix quality and natural wood beauty with the best manufacturing technologies and environmental responsibility.

## ECO- FRIENDLY MANUFACTURER

The whole production process optimizes the raw material and the tailings.

A close-up photograph of a human finger dropping a single, clear water droplet onto a small, vibrant green seedling that is growing out of dark, rich soil. The background is a soft, out-of-focus green, suggesting a natural, outdoor setting. The lighting is warm and focused on the droplet and the plant, creating a sense of care and growth.

## ABOUT US

### MISSION

Develop, manufacture and market products in harmony with the environment, aiming to guarantee the full satisfaction of our customers.

### VISION

Be a leader in the manufacturer of sustainable forest products.

### VALUES

Transparency of operations allowing the community to see environmental gains. Ethics in business respecting customers, society and the environment.

MANOA Forest

# WELCOME TO OUR OWN FOREST, MANOA

The mark of  
responsible forestry

FSC CERTIFIED FOREST

Exotic hardwoods coming from Triângulo's own private FSC certified forest, where the sustainable management guarantees adequate supply, preservation of the forest and protection of the ecosystem.

**What does it mean to the consumer to have Triângulo exotic hardwood floor at home?**

It means to be proud of having a beautiful high quality flooring and thus participating in one of the biggest projects of native forest preservation in the Americas.

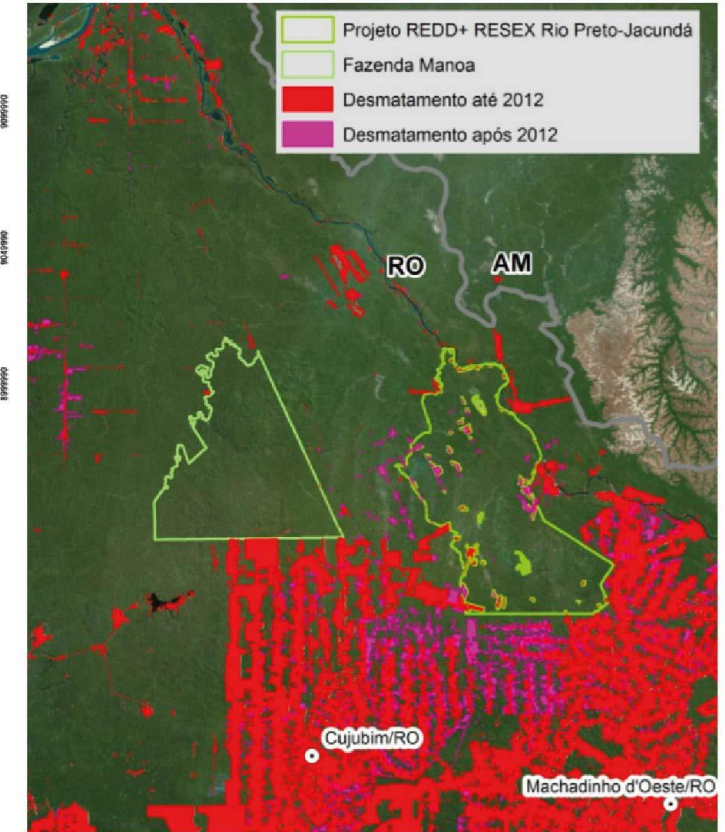

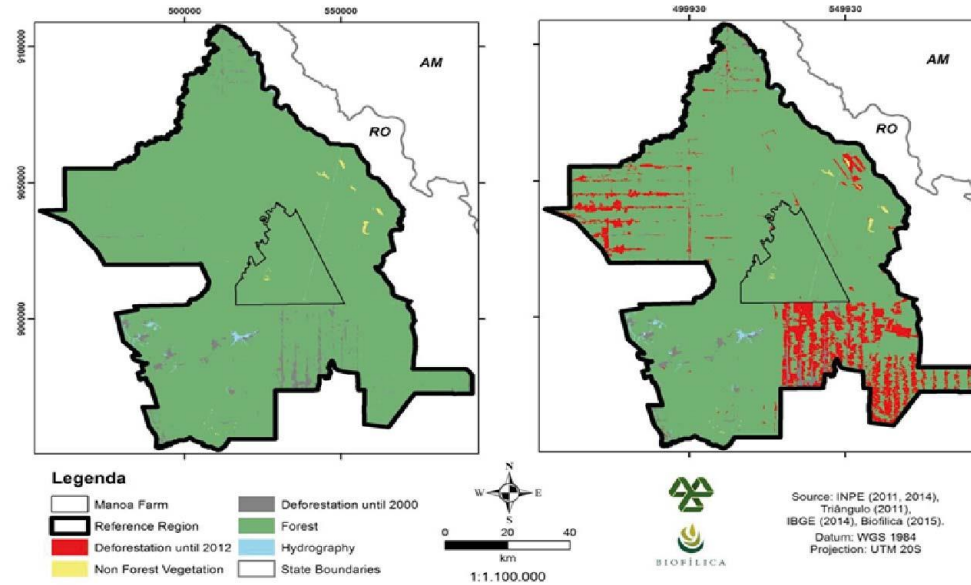

# Protecting the tropical forest

160,000 acres of private certified forest.

Triângulo has invested in the preservation of forests since it was founded.

Sustainable management guarantees adequate supply and revitalization of the native species.

In these images, you can see how sustainable management protects the forest from illegal logging, and deforestation.

# Social and Sustainability Projects

Sustainable management ensures a healthy and sustainable environment manufacturer's cycle, benefiting the population.

## CARBON PROJECT

Every year, this preserved forest area avoid the emission of 153,831 metric tons of CO<sub>2</sub>e or 4,614,942 metric tons of CO<sub>2</sub>e over 30 years.

This action contributes to a healthier atmosphere and air quality for not only the surroundings, but also the cities

## SCHOOL FOR CHILDREN

Manoa constructed schools, training centers, focusing mainly on the children of the region. Manoa actions in support of education, culture and leisure have directly benefited more than 400 children and young people in the last 2 years.

## FOREST EDUCATION

The greatest contribution to the community is education; that is why Triângulo maintains a school for the forest education and a training center for adults and students from all over the country.

# Healthy Products

Triângulo is recognized globally for its sustainability and positive environmental contributions!

Informs customers that representative samples of a product have undergone rigorous scientific testing to meet some of the world's most stringent chemical emission requirements - helping to reduce indoor air pollution and the potential for exposure to substances atmospheric chemistry.

The mark of responsible forestry

The forest certification seal is issued by certifiers that are constantly monitored by the FSC. The FSC aims to ensure that timber comes from a production process managed according to an ecologically sound, socially fair, economically viable management and complies with current national laws.

Although located in South America, Triângulo works in full compliance with the rules of the United States legislation to protect forests, banning the use of illegally sourced wood or other natural resources.
